### Practical 9: Reports & Dashboards

#### Introduction

Jira Reports and Dashboards are used to visualize project progress, issue status, sprint performance, and other project information.

#### Important Definitions

- **Burndown Chart:** Shows remaining work during a sprint.
- **Velocity Chart:** Shows the amount of work completed by the team in each sprint.
- **Pie Chart:** Displays issues divided into different categories.
- **Dashboard:** A customized page containing different Jira gadgets.

### Practical 9-A: Generate Burndown Chart and Velocity Chart

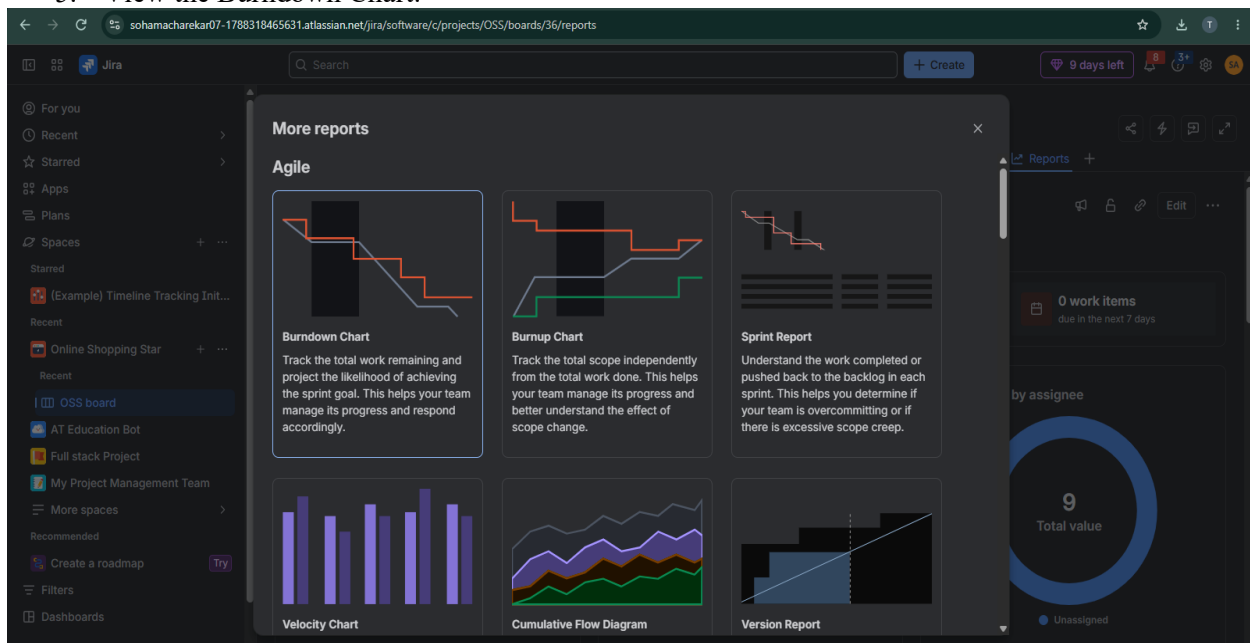

#### Objective

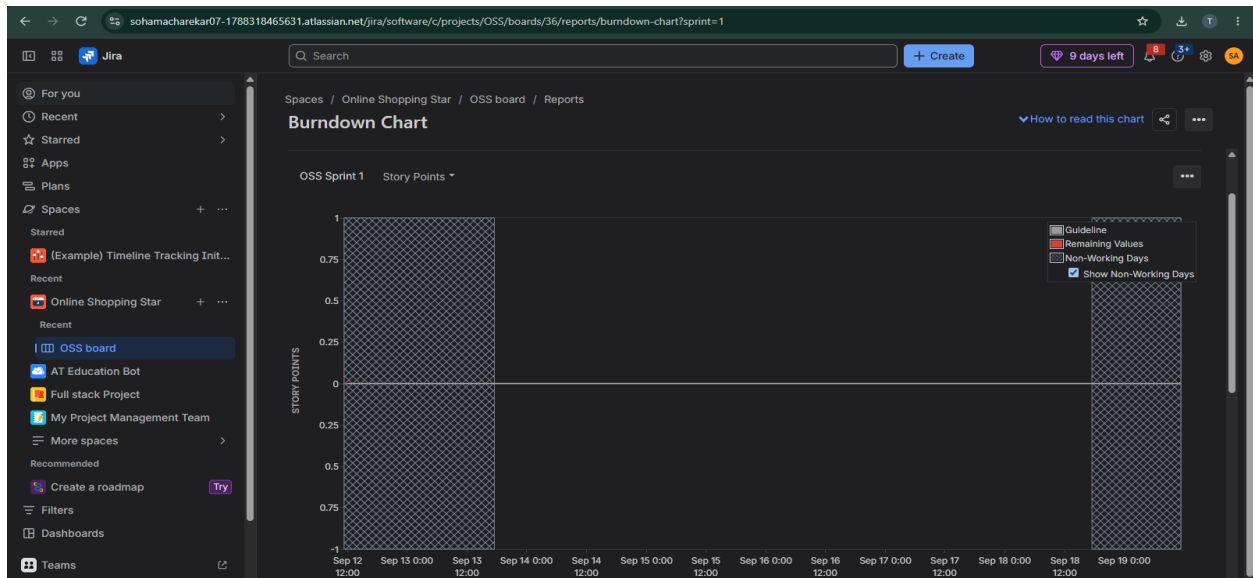

To generate Burndown and Velocity Charts for analyzing sprint progress.

#### Steps

##### Burndown Chart:

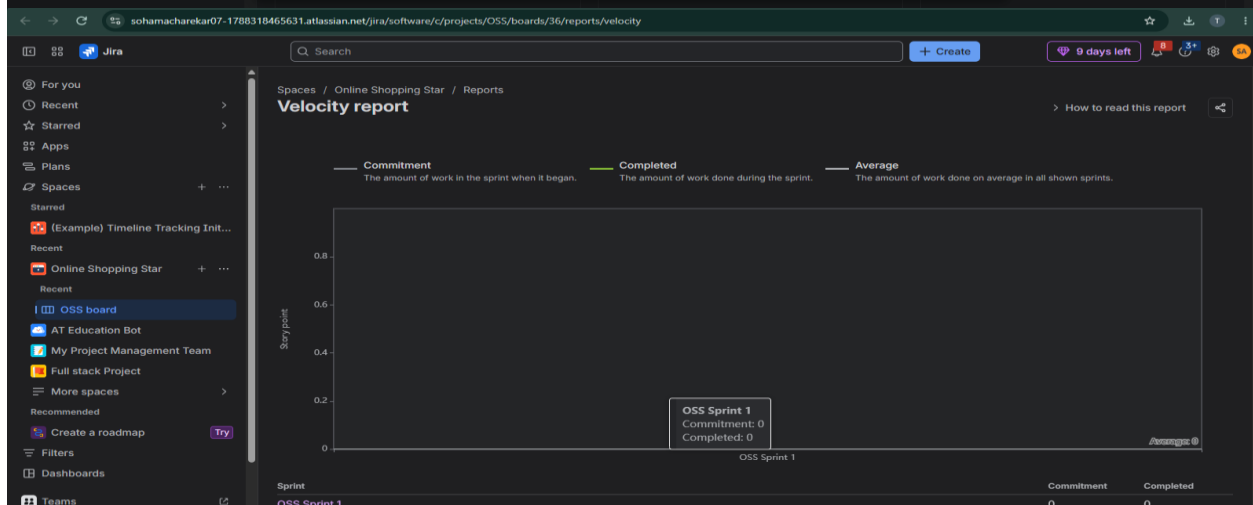

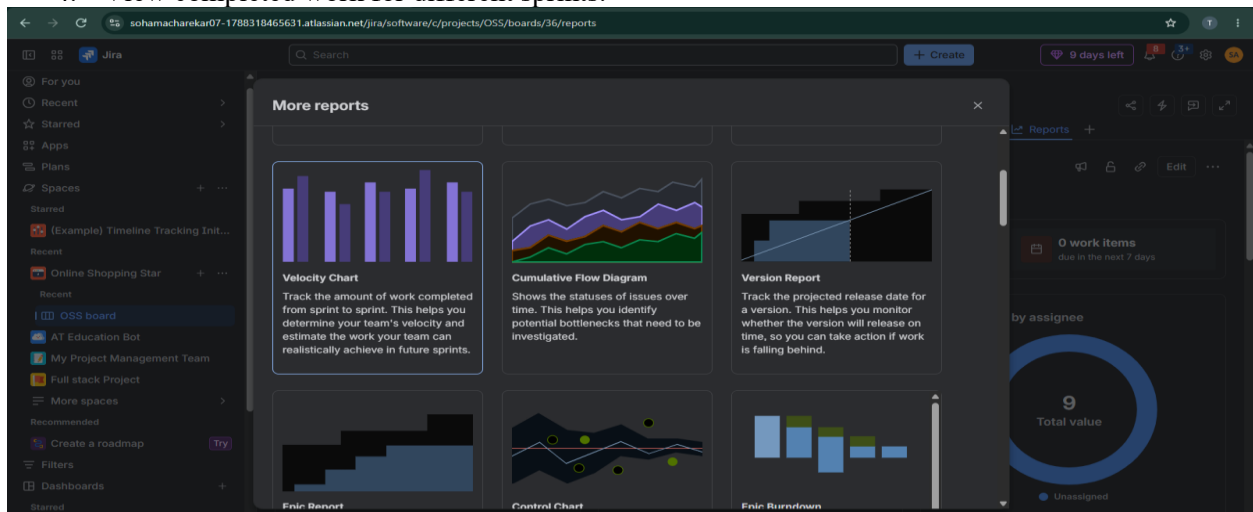

1. Open your Jira project.
2. Go to **Reports**.
3. Select **Burndown Chart**.
4. Select the required Sprint.
5. View the Burndown Chart.

### Velocity Chart:

1. Go to **Reports**.
2. Select **Velocity Chart**.
3. Select the required board/project.
4. View completed work for different sprints.

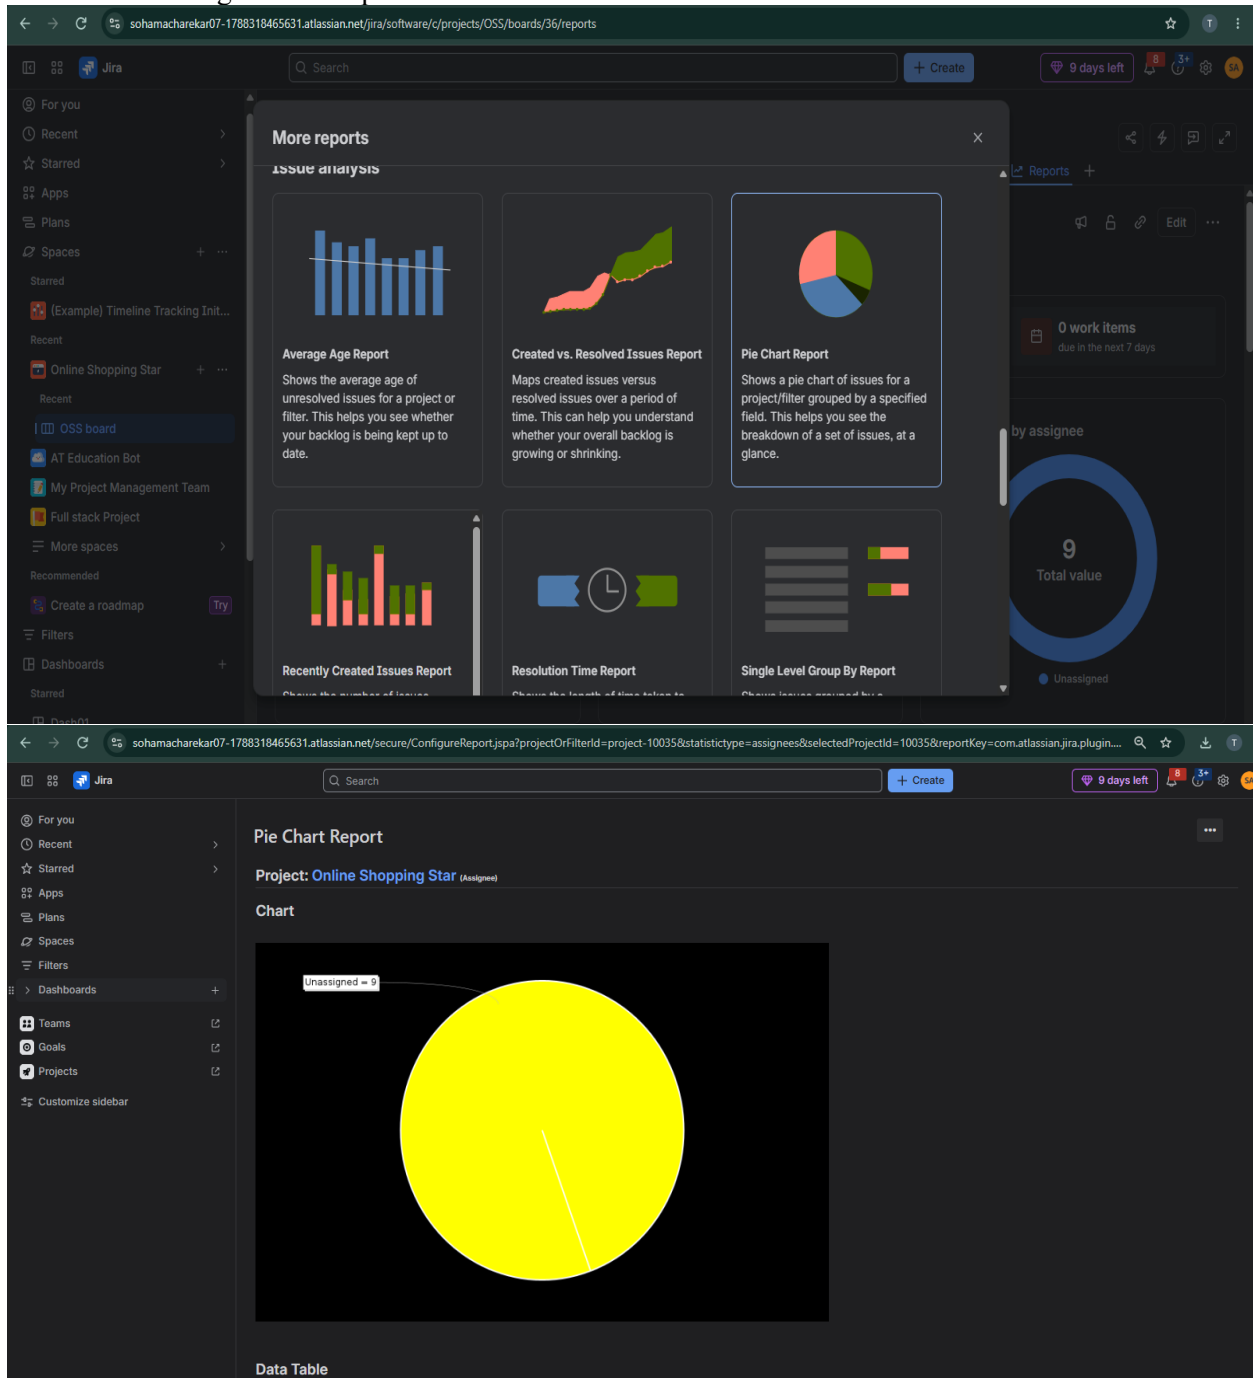

## Practical 9-B: Create Pie Chart / Issue Statistics Report

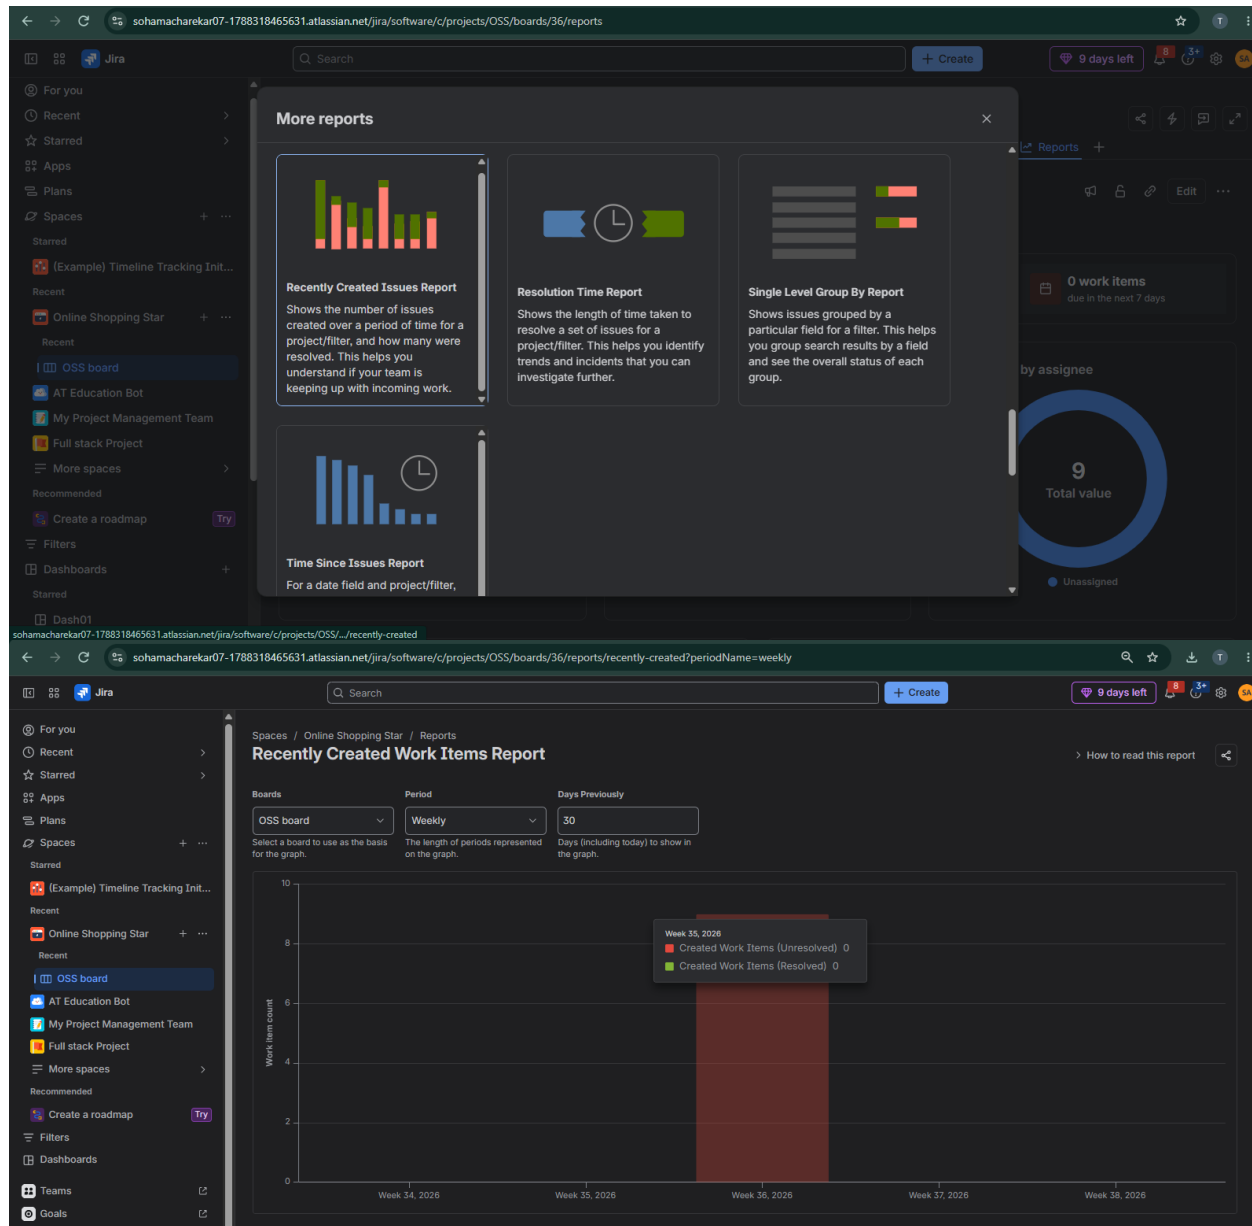

### Objective

To generate reports showing issue distribution.

### Steps

1. Open the Jira project.
2. Go to **Reports**.
3. Select **Pie Chart** or **Issue Statistics**.
4. Select the required **Project**.
5. Select the required statistic field such as **Status**, **Priority**, or **Assignee**.
6. View the generated report.

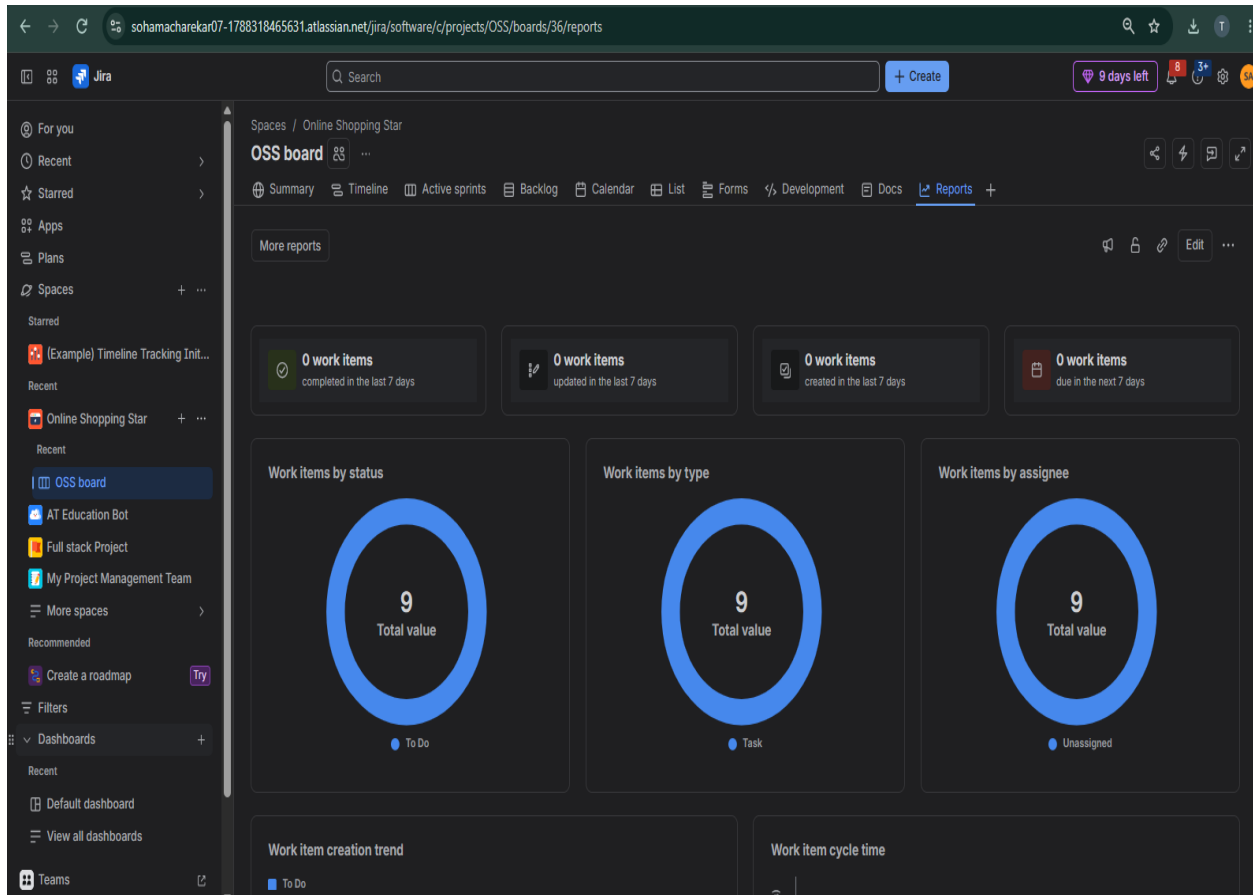

## Practical 9-C: Create a Custom Dashboard with Gadgets

### Objective

To create a customized Jira dashboard using different gadgets.

### Steps

1. Go to **Dashboards**.
2. Select **Create dashboard**.
3. Enter a dashboard name.
4. Click **Create**.
5. Click **Add gadget**.
6. Select required gadgets such as:
  - Pie Chart
  - Filter Results
  - Assigned to Me
  - Created vs Resolved Chart
7. Configure the selected gadgets.
8. Click **Save**.

9. Arrange the gadgets on the dashboard as required.
