Practical 7: Kanban Board Management

Introduction

Kanban Board is a visual tool used to manage and track work items through different stages. It helps users monitor the progress of issues from backlog to completion.

Important Definitions

- **Kanban:** An Agile method for visualizing and managing continuous workflow.
- **Kanban Board:** A board that displays work items in different workflow columns.
- **Backlog:** Contains work items that are yet to be started.
- **Assignee:** The user responsible for completing an issue.
- **Control Chart:** A report used to analyze the time taken by issues as they move through the workflow.

Practical 7-A: Create a Company-managed Kanban Project

Objective

To create and configure a company-managed Kanban project in Jira.

Theory

A Kanban project uses a visual board to track work through different stages. A company-managed project provides centralized configuration of the project's board and workflow.

Steps

1. Navigate to **Spaces**.
2. Click **Create Space**.

3. Select the **Kanban** template.

4. Click **Use template**.
5. Enter the required **Space Name**.
6. Select **Company-managed**.
7. Click **Next**.

8. Add team members if required.
9. Complete the setup.

10. Open the created **Kanban Board**.**Practical 7-B: Configure Kanban Board****Objective**

To create, assign, and configure an issue on the Kanban board.

Theory

Issues on a Kanban board can be assigned to users and configured with priority and due dates. This helps in managing responsibility and deadlines.

Steps

1. Open the created **Kanban Board**.
2. Create a new **Task** in the **Backlog**.

3. Enter the required task details.
4. Open the created task.

5. Assign the task to the required user.

6. Set the Priority.

7. Set the Due Date.

8. Save or update the issue.

Practical 7-C: Track Issue Progress and View Control Chart

Objective

To track issue progress on the Kanban board and view the Control Chart.

Theory

Kanban allows issues to move through different workflow stages. The **Control Chart** helps analyze the time taken by issues during the workflow.

Steps

1. Open the **Kanban Board**.
2. Move the issue from **Backlog** to **Selected for Development**.
3. Move the issue to **In Progress**.
4. Move the issue to **Done** after completion.

5. Navigate to **Reports**.
6. Under **Agile**, select **Control Chart**.

7. View the **Control Chart** and issue progress.
