Practical 8: JQL & Filters**Introduction**

JQL (Jira Query Language) is used to search and filter Jira issues based on conditions such as **Status, Assignee, and Priority**.

Important Definitions

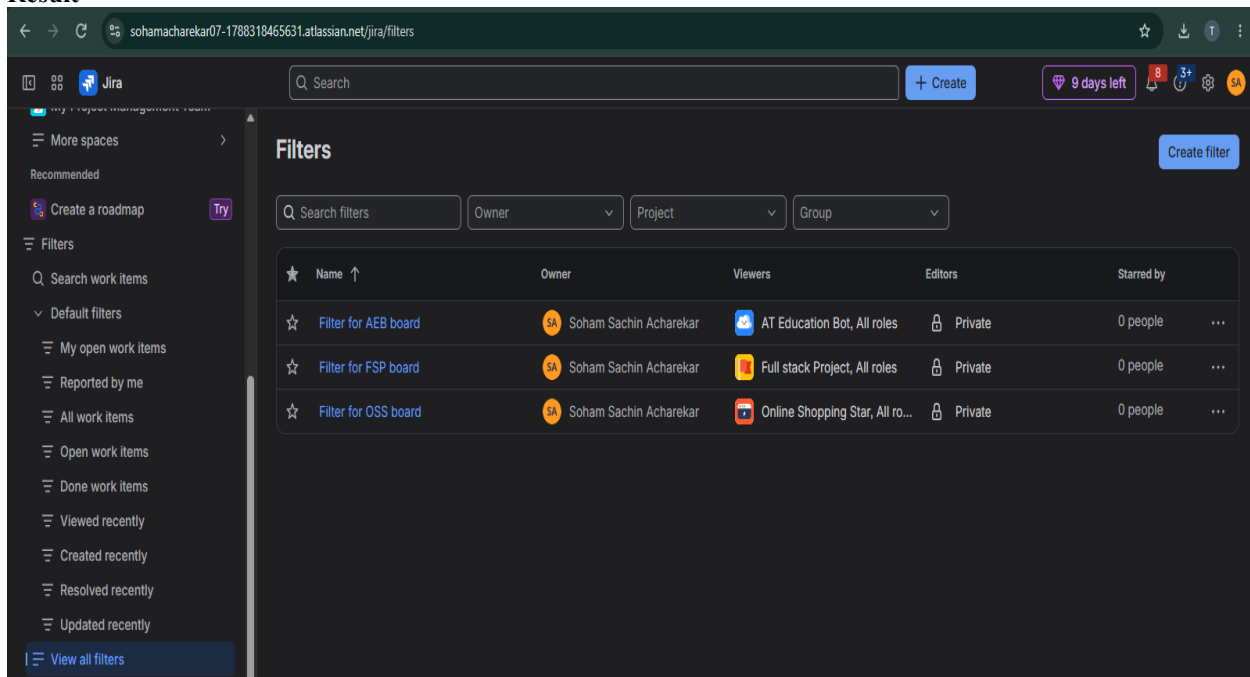

- **JQL:** Language used to search Jira issues.
- **Filter:** A saved search used to access required issues quickly.
- **Status:** Current stage of an issue.
- **Assignee:** User responsible for an issue.
- **Priority:** Importance level of an issue.

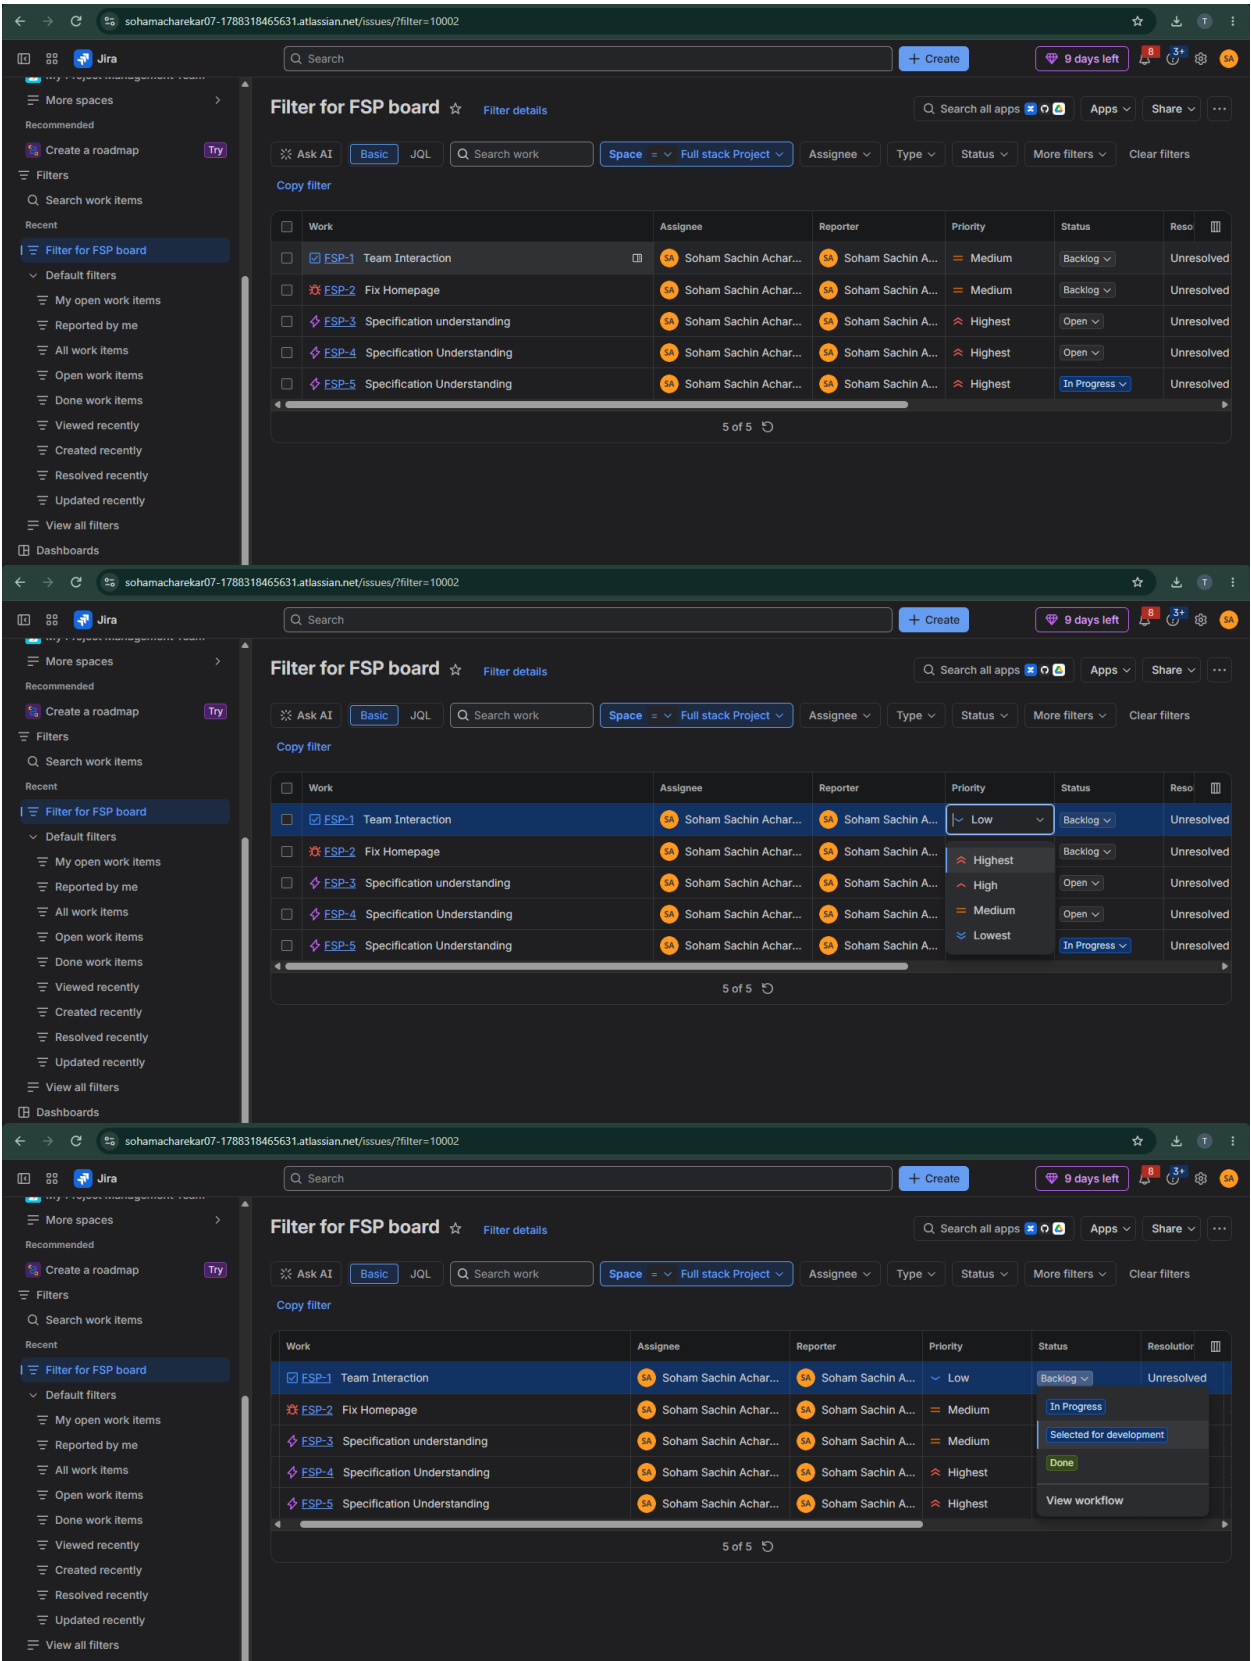

Practical 8-A: Write Basic JQL Queries**Objective**

To create basic JQL queries using Status, Assignee, and Priority.

Steps

1. Open Jira and go to **Filters**.
2. Select **View all filters**.
3. Select the Project.
4. Assign value to Filters.
5. Save Filters..

Result

The top screenshot shows the Jira 'Filter for FSP board' interface. The left sidebar contains navigation options like 'More spaces', 'Recommended', 'Create a roadmap', 'Filters', 'Search work items', and 'Recent'. The main area displays a table of issues with columns: Reporter, Priority, Status, Resolution, Created, Updated, and Due date. A calendar widget for September 2026 is visible on the right.

The bottom screenshot shows the same interface with a dropdown menu open for assigning an issue. The dropdown lists 'Unassigned', 'Automatic', 'Pranay Rajesh Bhadwalkar', and 'T009 Siddhesh Kamble'. The issue being assigned is 'FSP-2 Fix Homepage' with a status of 'Backlog' and priority of 'Medium'.

Practical 8-B: Create and Save Filters

Objective

To create and save filters using JQL.

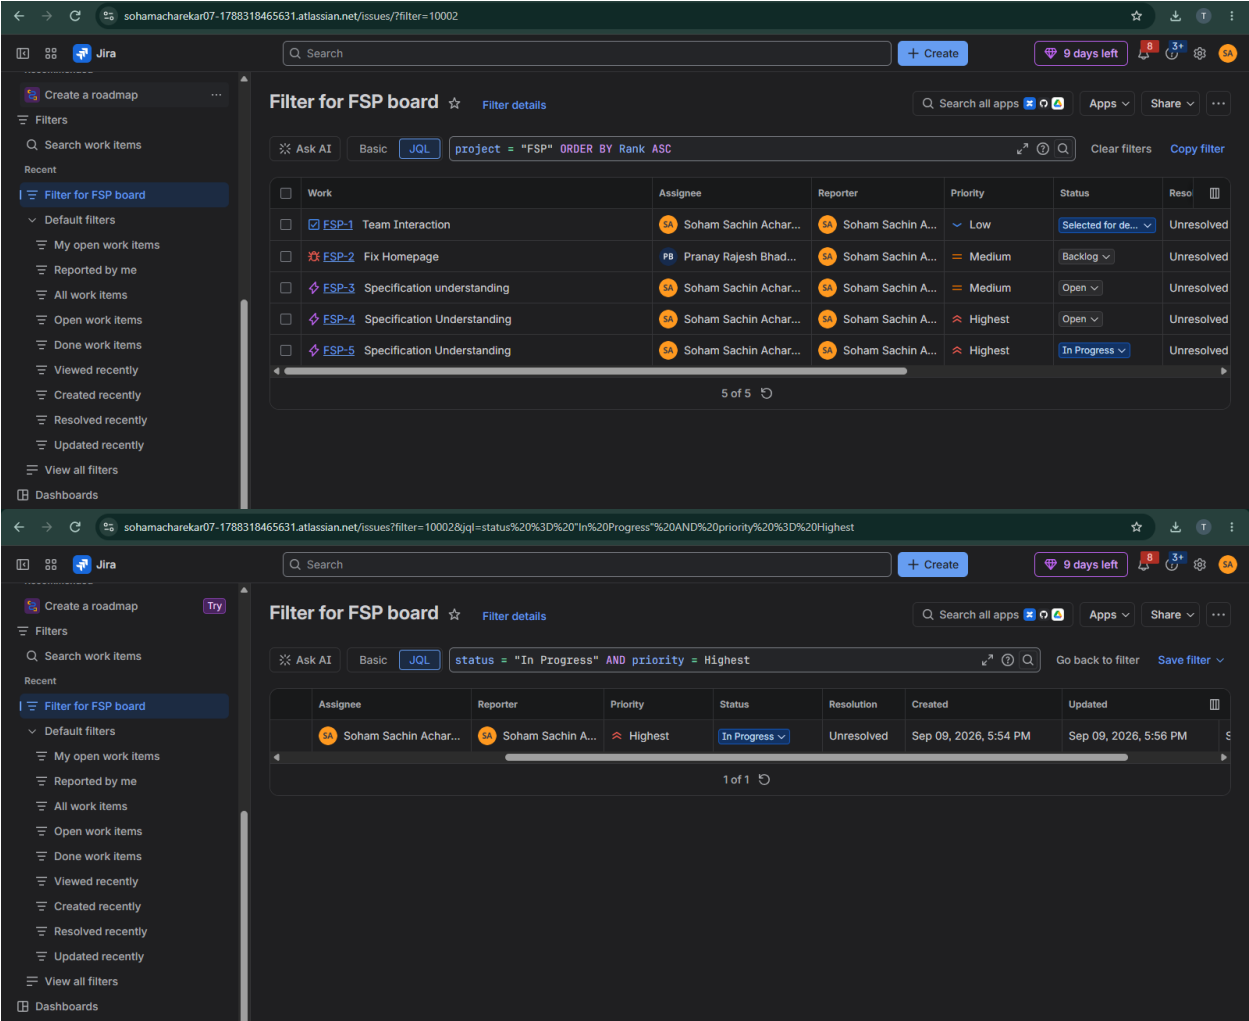

Steps

1. Go to **Filters**.
2. Select **View all filters**.
3. Select the required **Project**.
4. Open **Advanced/JQL** search.
5. Enter the required JQL query.
6. Assign the required values to the filters.
7. Check the displayed issues.
8. Click **Save as / Save Filter**.
9. Enter a suitable filter name.
10. Click **Save**.

For example:

status = "In Progress" AND priority = High

Result

Conclusion

JQL queries were successfully used to search Jira issues, and the required filters were created and saved.
