Practical 11: Jira Automation

Introduction

Jira Automation performs actions automatically when a specified event or condition occurs.

Important Definitions

- **Trigger:** Starts the automation rule.
- **Condition:** Checks whether a requirement is satisfied.
- **Action:** Performs an automatic operation.
- **Automation Rule:** A combination of trigger, condition, and action.

11-A & 11-B: Create, Configure, Test and Enable Automation Rule

Objective

To create an automation rule using **Trigger** → **Condition** → **Action**, configure it, and test the rule.

Steps

1. Open the **ScrumOrbit** project.
2. Go to **Space settings**.
3. Select **Automation**.

4. Click **Create automation**.

5. Add a trigger from the Panel as Field Value Changed.

6. Enter details in Field Value Changed:

Field	Value to Select
Fields to monitor for changes	Status
Change type	Any changes to the field value
For	All work item operations

7. Then click **Add condition** and configure **Work item field conditions**.

Setting	Value
Field	Status
Condition	Equals
Value	Done

8. Click **Add action**.

9. Select **Send email or Assign work item**.

10. Configure the required action.

The top screenshot shows the Jira Automation interface for the 'Online Shopping Star' space. The 'Automation' tab is selected, and a new rule is being configured. The trigger is 'Value changes for Status', and the condition is 'Status equals Done'. The action is 'Send email' to 'sohamacharekar07@gmail.com' with the subject 'Task Complete'. The right sidebar shows the email configuration details, including the email name, recipients, and subject.

The bottom screenshot shows the 'Turn this flow on' dialog. The flow name is 'Status Done', and the 'Who can edit this flow?' is set to 'Private'. The 'Turn on flow' button is visible at the bottom.

Result

An automation rule was successfully created.

11-C: Test and Enable Automation Rule

Steps:

1. Click Turn on flow → Enter Flow name.

The screenshot shows the Jira Automation interface for the 'ScrumOrbit' space. The 'Automation' tab is selected, and a new rule is being configured. The trigger is 'Value changes for Status', and the condition is 'Status equals Done'. The action is 'Send email' to 'kamlesiddhu26@gmail.com' and 'prandhadmvu@gmail.com' with the subject 'Task Complete'. The right sidebar shows the 'Turn this flow on' dialog with the flow name 'Status Done' and edit permissions set to 'Private'. The 'Turn on flow' button is highlighted.

2. Click the Turn on flow button.

3. As the task is complete, email is sent and received.

Result

The automation rule was successfully enabled and tested.

Conclusion

Jira Automation was successfully configured to perform actions automatically.
