Practical 6: Scrum Board and Sprint Management

Introduction

Scrum Board is used in Jira to organize and track work during a sprint. It helps teams manage issues through different stages and monitor sprint progress.

Important Definitions

- **Scrum:** An Agile framework where work is divided into time-based iterations called sprints.
- **Sprint:** A fixed period during which a selected set of issues is completed.
- **Backlog:** A list of issues and work items that are planned for development.
- **Story Points:** A measure used to estimate the effort required to complete an issue.
- **Sprint Report:** A report that shows the progress and completion of work during a sprint.

Practical 6-A: Create and Configure Scrum Board

Objective

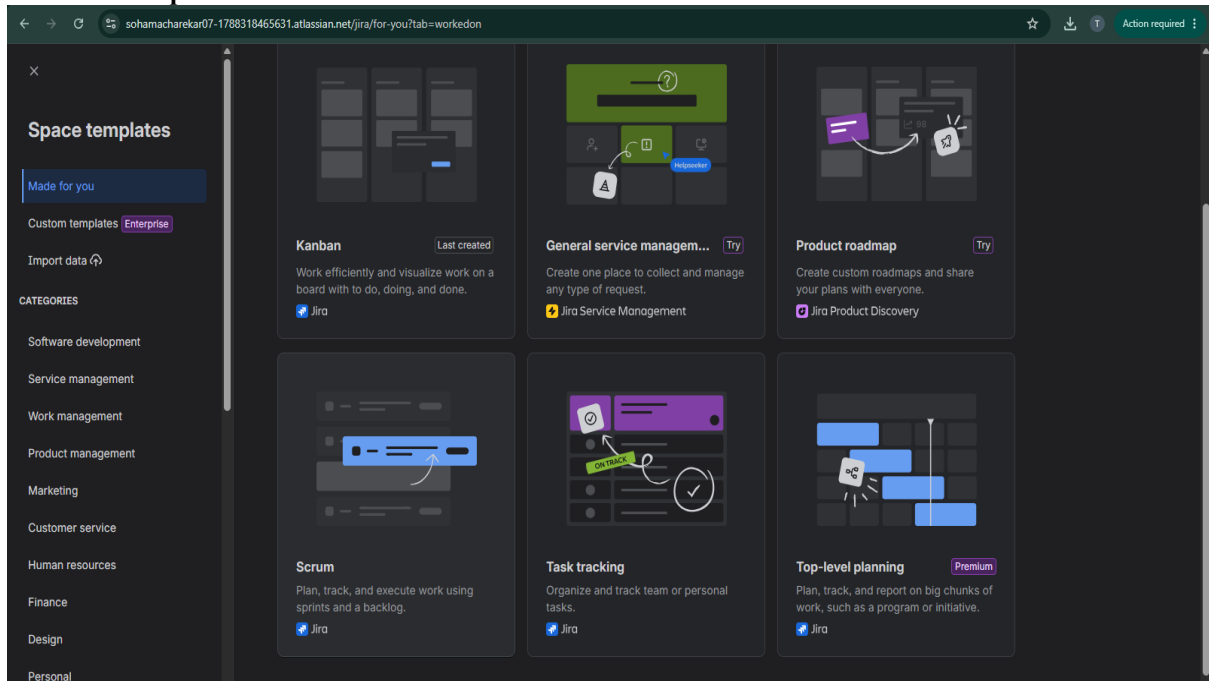

To create and configure a Scrum board in Jira for managing project work.

Theory

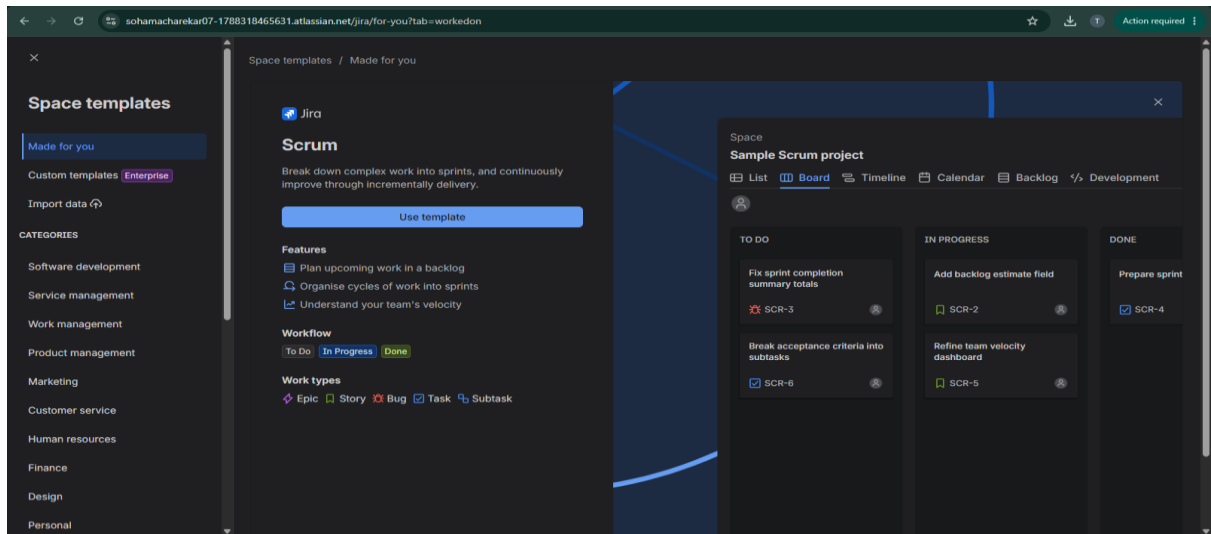

A Scrum board provides a visual way to manage issues and sprints. It contains features such as **Backlog** and **Active Sprints** to organize and track project work.

Steps

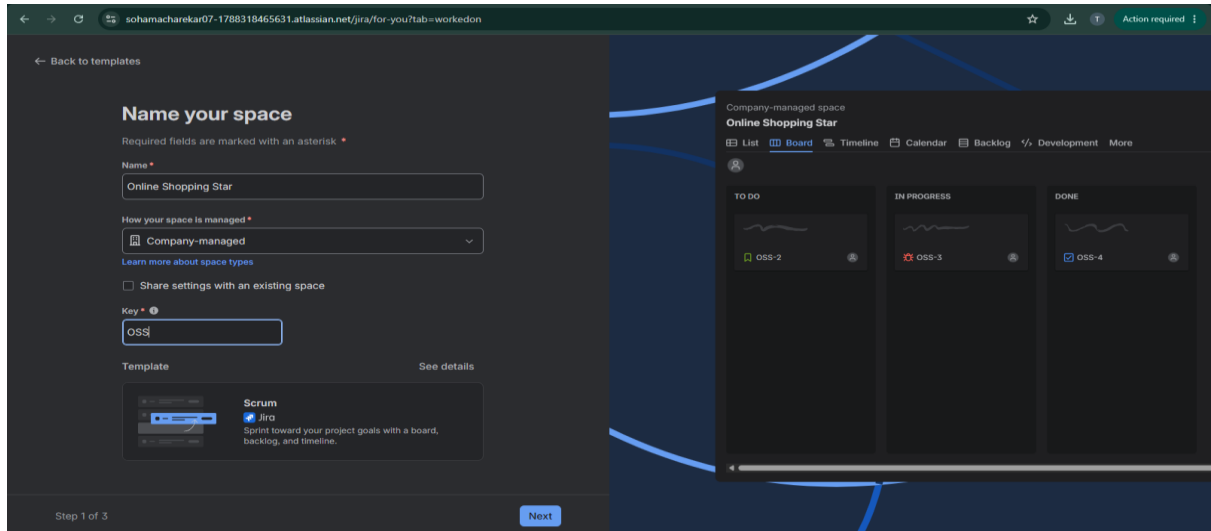

1. Navigate to **Spaces**.
2. Click **Create Space**.

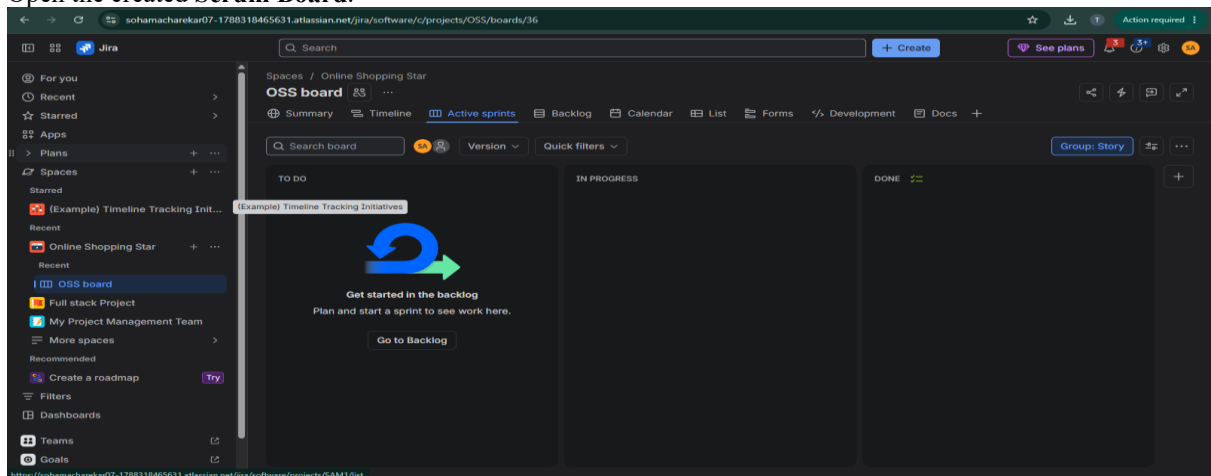

3. Select the **Scrum** template.

4. Click **Use template**.
5. Enter the required **Space Name**.
6. Select **Company-managed**.
7. Click **Next**.

8. Add team members if required.
9. Complete the setup.
10. Open the created **Scrum Board**.

Practical 6-B: Create and Start a Sprint

Objective

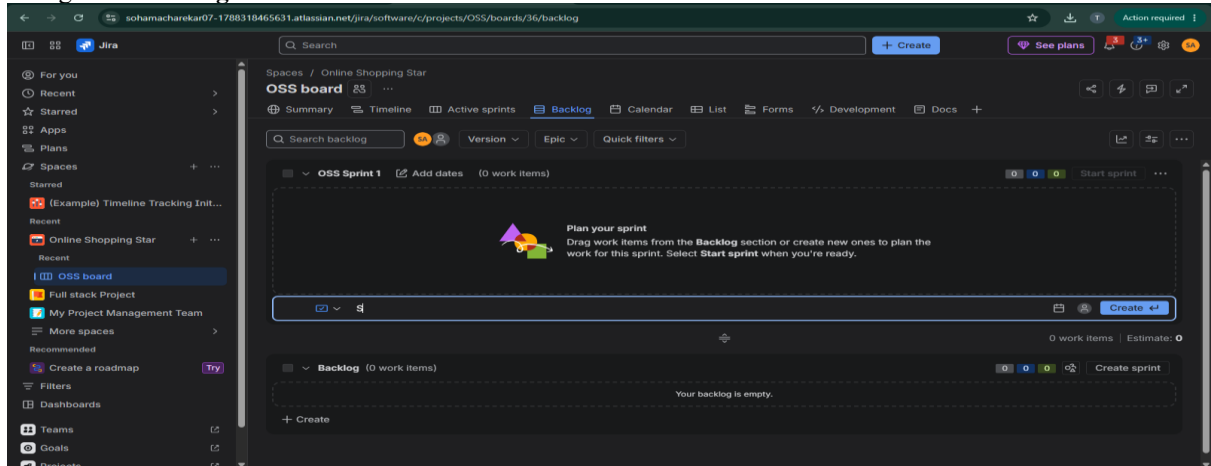

To create issues, add them to a sprint, and start the sprint.

Theory

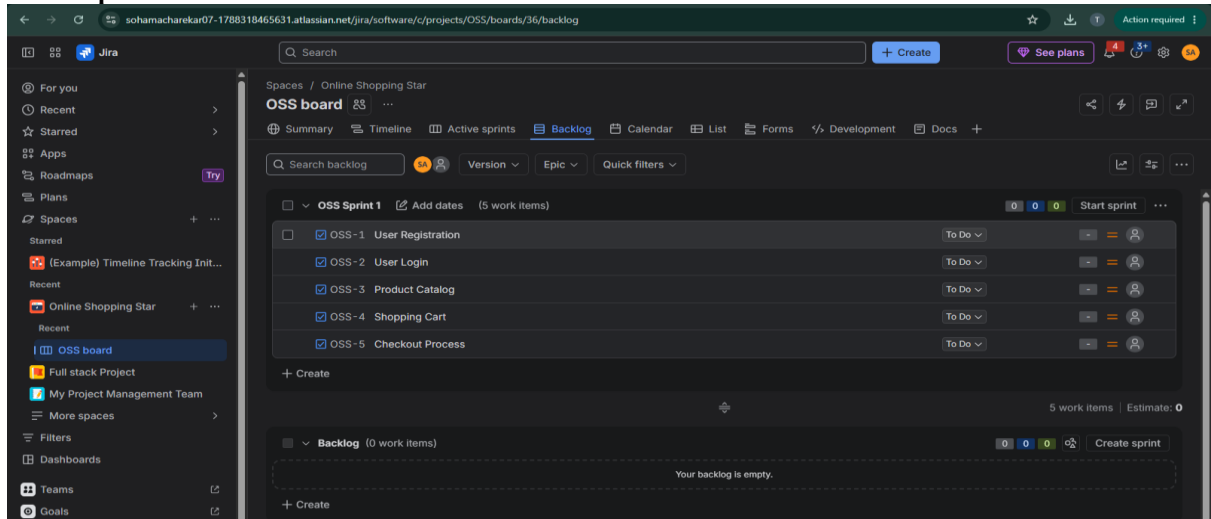

A **Sprint** is a fixed period in which selected issues are completed. Issues from the backlog can be added to a sprint and tracked using the Scrum board.

Steps

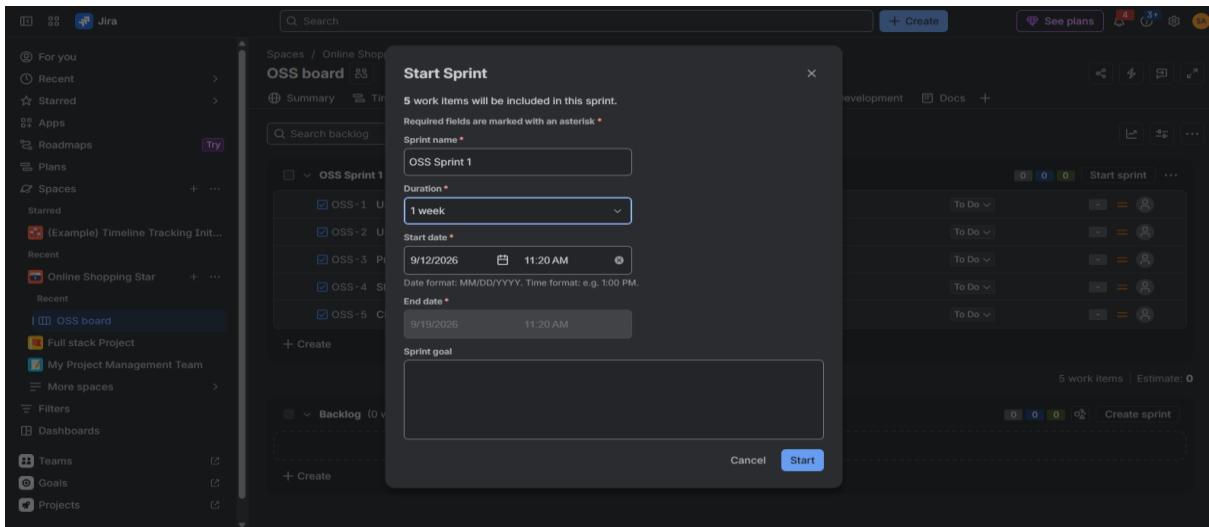

1. Open the created **Scrum project**.
2. Navigate to **Backlog**.

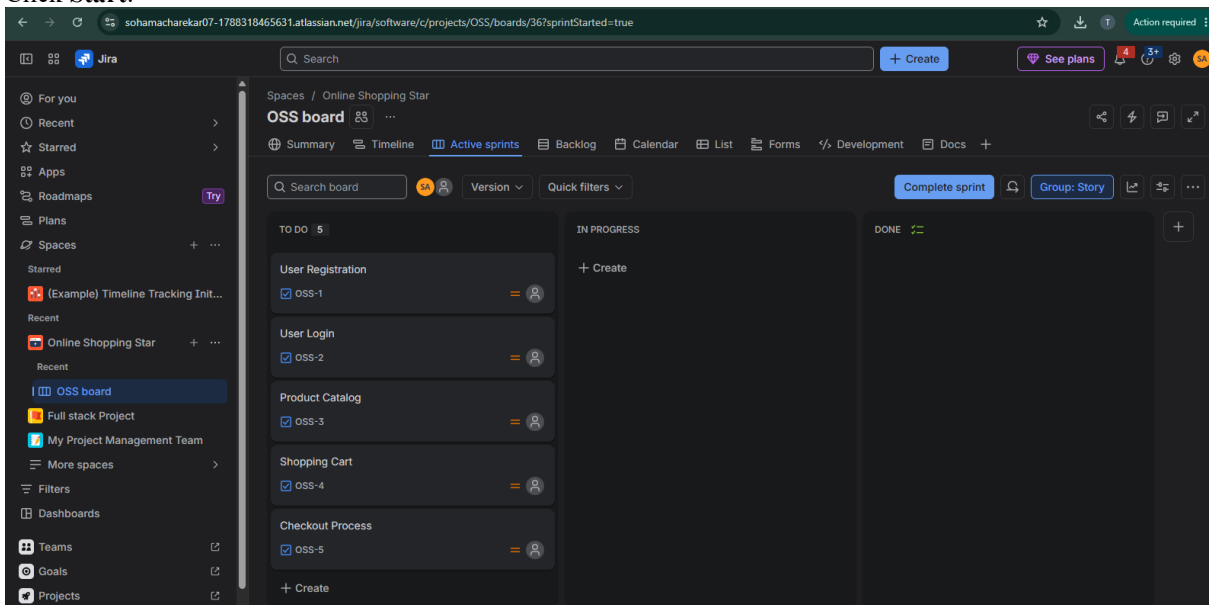

3. Create the following issues:
 - **User Registration** – 3 Story Points
 - **User Login** – 3 Story Points
 - **Product Catalog** – 5 Story Points
 - **Shopping Cart** – 8 Story Points
 - **Checkout Process** – 13 Story Points
4. Create **Sprint 1**.

5. Move the required issues into **Sprint 1**.
6. Click **Start Sprint**.
7. Check the sprint details.

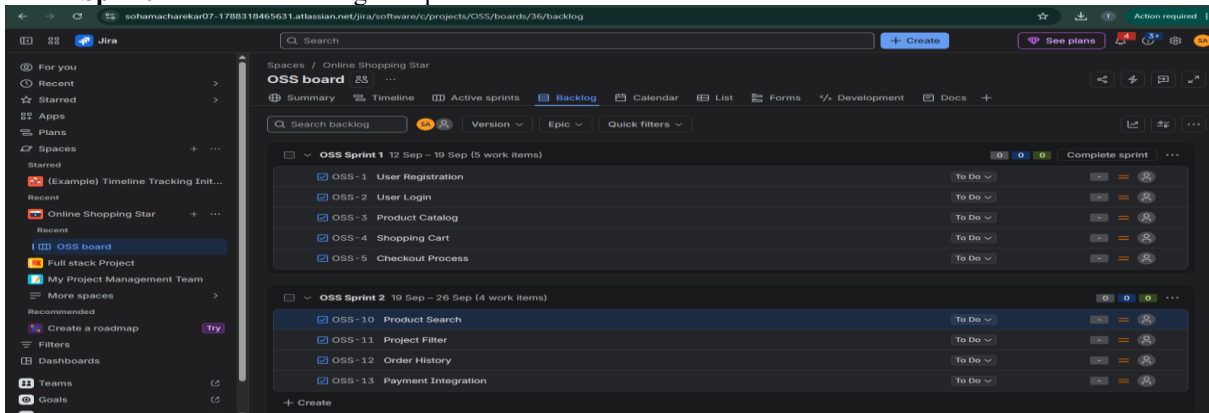

8. Click **Start**.

9. Open **Active Sprints** to view the running sprint.

10. Create **Sprint 2** from the Backlog if required.

Practical 6-C: Complete Sprint and View Sprint Report

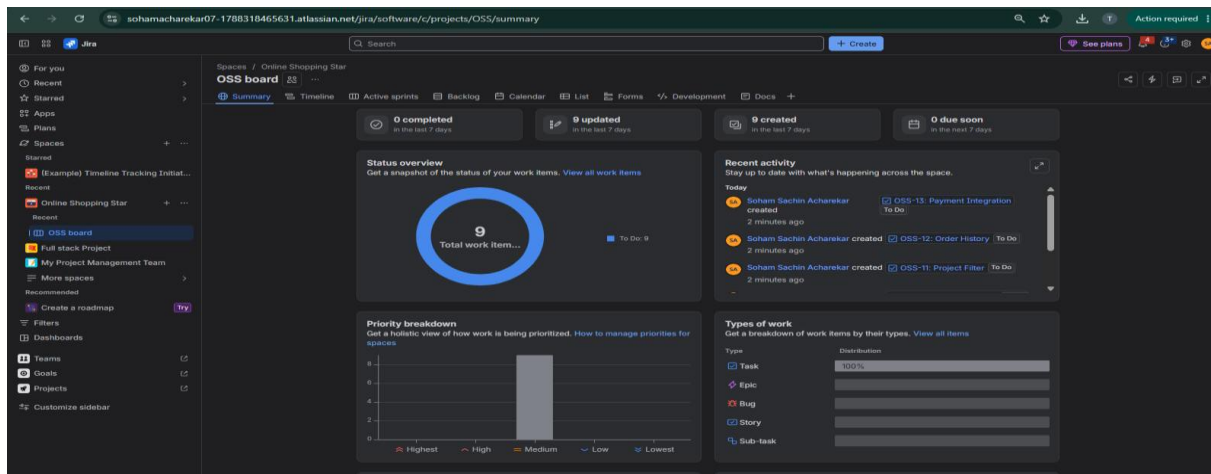

Objective

To complete a sprint and view the Sprint Report.

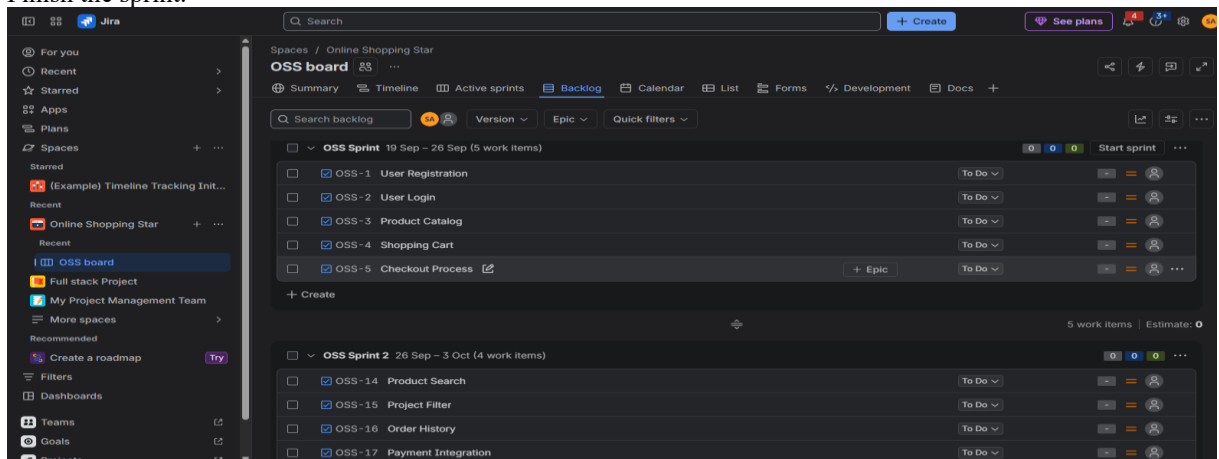

Theory

A **Sprint Report** provides information about the work completed and remaining during a sprint. It helps in reviewing sprint performance.

Steps

1. Open **Active Sprints**.
2. Complete the required issues.
3. Finish the sprint.

4. Navigate to **Reports**.
5. Select **Sprint Report**.
6. View the sprint summary and issue progress.
