Practical 12: Introduction to Jira Mobile App

Introduction

The Jira Mobile App allows users to access projects, view issues, update issues, add comments, assign issues, and receive notifications from mobile devices.

Important Definitions

- **Jira Mobile App:** Mobile application for accessing Jira.
- **Issue:** A task or work item managed in Jira.
- **Notification:** Alert about changes or activities in Jira.
- **Real-Time Update:** Immediate synchronization of changes.

12-A: Install and Configure Jira Mobile App

Objective

To install and configure the Jira Mobile App.

Steps

1. Open the **App Store** on your mobile device.
 - a. For Android: Open **Google Play Store**.
 - b. For iPhone/iPad: Open **Apple App Store**.
2. Search for: Jira Cloud by Atlassian
3. Select the **Jira Cloud by Atlassian** app.
4. Click **Install**.

5. Wait until the app is completely installed.
6. Tap the **Jira icon** to open the app.
7. Select **Log In** or **Sign Up**.
8. Log in using your **registered Gmail account** or correct Jira/Atlassian credentials.
9. After logging in, click **Set Up Jira**.

10. The Jira setup screen will be displayed.
11. Click **Next**.
12. On the **Notifications** screen, select:
All notifications.
13. Click **Next**.
14. When Jira asks for permission to send notifications, select:
Allow.

15. Click **Update app permissions**.
16. Select **Allow All Permissions**.
17. Click **OK**.
18. On the **Do Not Disturb** screen, click **OK**.

19. Continue through the setup screens until the Jira dashboard is displayed.
20. Verify that the **Jira dashboard/home screen** is displayed successfully.

Result

The Jira Mobile App was successfully installed and configured.

12-B: View and Update Issues from Mobile

Objective

To view and update Jira issues using the mobile application.

Steps

1. Open the **Jira Mobile App**.
2. Go to **Spaces**.
3. Select the required **Space**.

4. The **Summary** page of the selected space will be displayed.
5. To create a sprint, select the **Project**.
6. Open the **Backlog** section.

7. Click **Create** to create a new work item.
8. Create an issue.
9. Enter the required issue details.
10. Click **Done**.

11. The created work item will appear in the **Sprint/Backlog**.
12. Click **Start Sprint**.
13. Set the **End Date** for the sprint.

14. Click **Start Sprint**.
15. The work item will appear on the **Board**.
16. Open the **Board** to view the work item.

17. Track the progress of the work item on the board.
18. Update the work item as required by changing its **Status**.
19. View the updated status and progress of the work item.

20. Open the **Summary** section.
21. Verify the displayed work-item information, including **completed, updated, created, and due-soon items**.

Result

Jira issues were successfully viewed and updated from the mobile application.

Conclusion

The Jira Mobile App was successfully used to manage issues, comments, assignments, statuses, and notifications.
